Introduction:

The forest lands which are diverted for non- forestry uses are to be compensated by undertaking compensatory afforestation in equal quantum of non-forest areas, amount recovered to carry out Afforestation in the double degraded forest areas., recovering Net Present Value (NPV), any other recovery, as specified while according approval. This fund is managed by Compensatory afforestation fund management and Planning Authority (CAMPA) and is utilized for undertaking Compensatory afforestation, additional plantation as specified under additional conditions and other forest improvement and management related activities, as provided in CAMPA fund utilization guidelines.

Over a period of time, compensatory afforestation works and other forest improvement and management activities have been undertaken, annually, under CAMPA by forest department, under various district of Gujarat.

The department has organizational system of undertaking monitoring and evaluation of the works. The monitoring branch carries out this task annually to the extent of 5- 6% and brings out the reports of monitoring and analyses the causes for poor results of plantations and suggests the remedial measures.

CAMPA guidelines provide for undertaking Third Party monitoring of compensatory afforestation and other activities undertaken under CAMPA funds. In view of the same, it is planned to undertake monitoring and evaluated of works, done under CAMPA, as Third Party Monitoring, by some external agency, - experienced and reputed Government or non-government organization or reputed and experienced people. It is aimed to get a correct, unbiased and clear status which can be brought out and projected before the public, policy makers and other stakeholders.

Objectives of the assignment:

1. To assess the growth, performance, survival and success of plantations done under CAMPA scheme and through CAMPA funds in different agro-climatic zones of the state.
2. To assess the quality, quantity, performance and impact of various other activities – check dams, check walls, Van talavadi works done under CAMPA scheme and through CAMPA funds in different agro-climatic zones of the state.
3. To assess the quality, quantity, performance and impact of various other activities – rubble walls, boundary pillars, demarcation works etc, done under CAMPA scheme and through CAMPA funds in different agro-climatic zones of the state.
1. To assess the quality, quantity, use and impact of various building assets created – staff quarters, checking naka, rescue centre, animal enclosure, constructed under CAMPA scheme and through CAMPA funds in different agro-climatic zones of the state.
2. To identify the areas of success and failure and to suggest suitable measures for effective execution, better implementation, success replication and high impact –high utility activities.

Coverage of study:

- a. The study will cover all districts/divisions and all models in entire state where plantations/ activities have been done under CAMPA funds. No district/divisions should be left out in the study.
- b. The proposals should give clear outline design. The department is carrying out its annual monitoring and evaluation exercise with a sample size of approx. 15% of the population by Stratified Random Sampling methods, as criteria for monitoring so as to

cover all the districts/divisions, models and activities. The competing party shall undertake monitoring and evaluation exercise with a sample size of approx. 15% of the population by Stratified Random Sampling methods, as criteria for monitoring ensuring that sample must cover all the districts/divisions, models and activities where plantation/ activities under CAMPA have been undertaken. For other activities, i.e. construction activities undertaken under AMPA, 100 % monitoring will be required. Party will indicate the sample size requirements, methodology of sample selection, sampling procedure, data collection and its analysis so as to evaluate the proposals with reference to the requirements of Forest Department. In case of plantations, 100% enumeration of plants planted in each sample selected shall be carried out.

Estimate cost of the project:

The cost of project is estimated to be around Rs.25.0 lac.
